## **DETAILED ACTION**

### ***Priority***

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 20, 25, and 29 are rejected under 35 U.S.C. 102(3) as being anticipated by Matsui (U.S. Patent No. 6,549,213 B1).

Matsui discloses a camera 10; a plurality of sensors 16-19 and a controller 36 that triggers the digital camera to capture an image when both eyes are closed simultaneously for a given period of time (see column 5 lines 34-36 and column 7 lines 9-14). The voluntary closure of the left eye is a physiological response and the simultaneous voluntary closure of the other (right) eye is a different physiological response from the closure of the left eye. The given

Art Unit: 2851

period of time is the time from when the power is turned on, to the time at which the command to capture the image is given.

***Allowable Subject Matter***

3. Claims 21, 22, 26, 27, and 30-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 34-36 are allowed.

***Reasons for Allowance***

5. The primary reason for indication of patentability of the claims listed in paragraphs 3 and 4 above, are the specific natures of the physiological responses set forth in said claims, which patentably distinguishes over the voluntary blinking (closure) of the eyes disclosed by Matsui of the above rejection.

***Response to Arguments***

6. Applicant's arguments with respect to claims 20, 25 and 29 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2851

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
